Meeting among team

11 FEBRUARY 2025 / BAKUL

Agenda

VTN-VEN Connection Testing

1. Attempted to run **VTN and VEN** and establish a connection.
2. Used a **newer version of Docker** for testing and troubleshooting.
3. Documented the process for the client.

Testing OpenADR 3.0 in Node.js

4. Explored a **Node.js library** for OpenADR 3.0.
5. Evaluated its compatibility and functionality.

Software Structure Design

6. Discussed the overall **architecture and software design** for the project.
7. Identified key components and how they interact.

Requirement Review

8. Revisited the project requirements to ensure clarity.

Next Steps

9. Assess the feasibility of using the Node.js library for implementation.
10. Refine the software design and start development.

Next Meeting Agenda

1. Discuss integration strategy for different components.
2. Plan the next client meeting.
3. Plan to start development.
